Description:		
The Secteur de génie mécanique was created in 1989 as part of the former École de génie. It offered the Baccalauréat ès sciences appliquées (génie mécanique), which added to the existing BScA in civil engineering and BScA in industrial engineering offered by the École de génie. In 2006, the École de génie became the Faculté d'ingénierie and the Département de génie mécanique replaced the Secteur de génie mécanique.
